We cordially invite you to visit our Nurseries at West Newbury and Newburyport and see the fine quality of nursery stock that we are growing. Both Nurseries are located on improved roads easily accessible the year around.

If impossible to visit the nursery, we invite you to order by telephone or mail. We use the greatest possible care in the selection of all stock and we will gladly pay return charges and replace any stock not satisfactory if notified within five days after arrival of goods.

We are always glad to have customers order stock at the nursery where it can be seen, but we cannot dig orders while the customer waits to take them. We will gladly tag and reserve special plants if the type and size wanted is other than the usual nursery run, but as orders through the spring are promised several days in advance most of the time, it will be necessary to dig them in rotation as ordered and either hold them to be called for or to be delivered by our trucks. This is necessary as it is hardly fair to delay orders taken at an earlier date.

The above does not apply to Roses, Fruit trees or any of the various shrubs or evergreens that we often have dug ahead or heeled in.

During the spring planting season, our Nurseries are open from 7:00 A.M. until 5:00 P.M. every weekday. Closed Sundays. The balance of the year from 8:00 A.M. until 5:00 P.M. closing at noon Saturday.

# Foreword

For over one hundred years the Cherry Hill Nurseries have been engaged in the growing of fine trees and plants. This long experience enables us to supply you with strong hardy plants that are sure to thrive in our rugged New England climate.

All stock is freshly dug on orders and this insures all stock being in the best possible shape when delivered to our customers.

We guarantee all our stock to be true to name and will replace any that proves other than represented or refund the purchase price. Beyond that, we can give no further warranty, as we cannot control planting conditions, weather and aftercare.

All prices for stock are here at the Nursery, and packing on large plants will be charged at cost. We are equipped to make truck delivery on full loads throughout New England and the surrounding territory at a cost which in most cases is not greater than the combined cost of packing, freight or express. This is a very satisfactory method as plants are delivered fresh, directly to the planting site. On smaller orders, less than a full truck load, we can usually make combination load deliveries within a radius of 40 miles of the nursery, the cost being divided depending on the size of the order. These of course cannot be delivered on any specified date. All plants, however, not balled will be packaged or wrapped so that if the customer is not there on arrival, they will keep safely for several days.

Due to modern methods of handling, the transplanting season has been greatly extended. Our spring season usually commences the last of March or early April and continues through June during which time almost all plants may be safely moved. Our fall season starts with the planting of evergreens and perennials in late July and deciduous material from October until the ground freezes. Large trees are economically moved in winter with frozen balls of earth.

One to four plants of a single size and variety at the each rate; five to twenty-four at the ten rate; twenty-five or more at the hundred rate when such rate is given. These prices apply to our usual first grade stock, but when a tree or plant of outstanding quality is selected, a special price is charged.

Terms: charge accounts for thirty days' credit may be opened by new customers giving satisfactory bank or trade references, but to those unknown to us, we ask for cash with order.

Owing to the uncertainty of supplies, we reserve the right to change prices without notice.

With their large heads of flowers, varying in shades of bright crimson, pink or white, these are among our most striking of flowering shrubs. When not in bloom, the dark evergreen leaves give pleasing foliage effects. Many of the hybrids are not suitable as far north as this and we have selected and grown those of Rhododendron catawbiense parentage which have proved hardy. In planting, mix the soil with peat or leafmold, which has an acid reaction and is retentive of moisture during the summer. Heavy watering in the late Fall will provide the plants with sufficient sap to carry them through the dormant winter period.

# Fruit Trees

The home grounds are scarcely complete without some fruit trees. The flavor of fruit ripened on the plant has a delicacy which more than compensates for the care expended in cultivation.

Our list comprises varieties which we believe are satisfactory for this latitude. Due to present conditions, many are difficult to obtain and our supplies are limited.

## APPLES

	Each	Per 10
2 yr., 5 to 7 ft. . . . .	\$1.50	\$14.00

### Summer Varieties

**Red Astrachan**—One of the early reds. Very rich and juicy. Flesh slightly acid.

### Fall Varieties

**Cortland**—One of the recent McIntosh seedlings, resembling the McIntosh a great deal and even a better keeper.

**Gravenstein**—An old-time favorite, extra fine. Of large size with a delicate striping of yellow and red.

**Early McIntosh**—Fully as good eating as its parent plant, but available almost a month earlier than the McIntosh.

**Hyslop Crab**—Very hardy strong growing variety that bears enormous crops of bright red fruit.

**McIntosh**—Bright red with crisp white flesh. One of the best eating apples.

**Transcendent Crab**—Bright red and yellow, considered the very best for jelly.

### Winter Varieties

**Baldwin**—An old New England favorite. Deep red and of good size. Keeps well through the winter.

**Delicious**—A choice winter apple with a sprightly aroma and as its name implies is really delicious in taste.

## PEARS

	Each	Per 10
No. 1, 9-16 in., 5 to 7 ft. . . . .	\$2.20	\$20.00

**Bartlett**—An early variety. Considered one of the sweetest of all. Excellent for preserving or eating.

**Cayuga**—As large as Bartlett but with same sweet flavor as Seckel, its parent. Ripens a little later than Bartlett.

**Clapp's Favorite**—A very early variety and exceptionally good eating.

**Seckel**—Small, russet, very sweet and juicy.

PEACHES

	Each	Per 10
No. 1, 9-16 in. 4 to 6 ft....	\$1.35	\$12.50

**Belle of Georgia**—Early and considered one of the best of the white Peaches.

**Carman**—An early peach with white flesh and red cheek.

**Early Crawford**—An old-time yellow favorite, ripening in September.

**Elberta**—Considered one of the best of shippers and great for canning. Ripens in mid-September.

**Golden Jubilee**—A new very early yellow-flesh variety of fine shape and color.

**Hale Haven**—Very handsome fruit of contrasting red and yellow. Early.

**J. H. Hale**—An exceptionally nice yellow peach. Good color and flavor. Mid-September.

**Valiant**—A new large yellow variety. Produces heavily and has extra fine flavor. Ripens about September first.

**Vedette**—A new cross of Elberta. It is as large with better color and quality. Ripens three weeks before Elberta.

(All the above varieties are freestone)

CHERRIES

	Each	Per 10
No. 1, 9-16 in., 5 to 7 ft...	\$2.25	\$20.00

**Black Tartarian**—Large sweet fruit almost black.

# Roses

In our northern climate, roses must be selected with a thought for hardiness and vigor as well as the bright color effects desired in the garden. Our list covers a wide range of color and we have found these to be vigorous. In this latitude the plants should be protected for the winter by heaping earth around them and then covering with a mulch so that they are covered six inches deep. In the spring prune back to live wood.

All our Hybrid Tea Roses are potted in generous-sized paper pots. **These will be available after May 1st.** They will then be well established and grow rapidly for bloom in June.

As the supply of roses is limited this year, we may be out of certain kinds and will substitute varieties similar in color unless otherwise directed. Please advise us if you do not wish substitutes.

We do not recommend fall planting of roses for this latitude.

## HYBRID TEA ROSES

These will give an abundance of bloom from June until frost. They should be liberally fertilized every year and given some protection from the sun and frost during the winter.

**Betty Grace Clark**—Attractive yellow flowers with deeper shadings of orange.

**Betty Uprichard**—Beautiful coppery pink with orange shadings. Back of petals carmine-pink. One of the best.

**Briarcliff**—Delightful silvery pink with golden lights at base of petals.

**Caledonia**—Large flowers of pure white. Considered one of the best white-flowered varieties.

**Charles K. Douglas**—A strong bright red. Free bloomer and holds its color in blooms all the season.

**Christopher Stone**—New. Brilliant scarlet of fine form and habit. Very attractive.

**Columbia**—Pointed buds of bright, glossy pink. Fragrant.

**Condesa de Sastago**—Deep coppery pink petals colored golden yellow on the reverse side making charming two-toned flowers.

**Dame Edith Helen**—Bright pink, of strong growth. Delightful perfume.

**Edith Nellie Perkins**—Rich salmon-pink buds inside of petals lighter, making a delightful contrast.

- Editor McFarland**—Long pointed buds open into large flowers of deep pink which retain their color until the petals fall.
- E. G. Hill**—One of the best brilliant red flowers. Form and fragrance very delightful.
- Etoile de Holland**—One of the world's best. Very hardy and vigorous. Beautiful crimson-red blossoms.
- Frau Karl Druschki**—One of the very best of the pure white varieties.
- Golden Ophelia**—Well-shaped buds of soft yellow, produced on a bush of strong growth.

## *Peonies*

This magnificent group of flowering perennials is one of the hardiest and most satisfactory for our northern climate. They endure for many seasons in the same location increasing in size and quality. They mark our years with their rich blooms.

The abundance of flowers in varying forms strike a strong note of color in the garden in May and June and the dark green foliage is pleasing throughout the summer. Peonies are especially decorative as cut flowers and many amateur enthusiasts give thousands every year to churches and hospitals.

We have endeavored to consistently maintain our free-blooming Cherry Hill Strain by selective propagation and the large rugged plants which we furnish give satisfactory results. We do not try to quote the cheapest prices, but we believe the value to be of the best.

### *Culture of Peonies*

Peonies will grow in almost any location, but do best when not planted too near large trees. However, where they are given some shade from the hot afternoon sun, the delicate colors may be retained. A good garden soil of loamy texture, where there is drainage, will produce satisfactory roots and flowers. In this type of soil, no especial preparation is necessary except to loosen and break up any lumps.

You may use any garden fertilizer available or bone meal. Wood ashes containing lime and potash have proved very satisfactory. The amount will be determined by the size of the plant, but a good handful is a rough measure. Too much rain may cause botrytis, a fungus which causes the stems to wilt and turn black. We find that ground limestone is one of the best correctives and this may be used freely. The diseased stems should be burned.

The roots should be planted so that the buds are about two inches below the surface when the ground is settled around them. Too deep planting will result in good foliage but no blooms. This is usually the cause for lack of blooms. Do not attempt to replant Peonies in soil where they have grown before, and if the same location is desired, the earth should be removed and replaced by fresh earth from another part of the garden. When the buds attain about an inch in size, they exude a sticky honey which is attractive to ants, but these seldom do harm and will disappear in a short time.

Peonies may be successfully planted at almost any time of the year, but are most easily handled in the fall from September to November, and early in the spring before the buds have pushed through the ground. The first season will not produce large and often not typical blooms. They should be treated as permanent plants and will grow and thrive from ten to twenty years in one location.

### NEW INTRODUCTIONS

For many years we have been growing new peonies from seed pollenized by the best known varieties. We have ob-

served these carefully for blooming qualities and have discarded those which did not measure up to our highest standard. The ones listed below are, we believe, of merit and will hold their place in any garden.

**Arthur H. Fewkes.** A variety originated by the late Arthur H. Fewkes and named by his family. Strong stems of medium height. Wide petals of fine form and texture, ivory white with salmon shadings at base of petals which give a buff or salmon light throughout the flower. Late. \$20.00 each.

**Amberglow.** Strong upright stems of medium height bearing dark green leaves which have a peculiar fluted effect. The bud is delicate pink and the flower globular, flesh pink with salmon lights. Late but opens well and is noticeable for its delicate coloring and crisp freshness. \$4.00 - \$5.00.

**Annisquam.** Large globular blooms of tender pink which retain their coloring until the petals fall. The petals are broad and rounded forming a cupped-shaped flower of smooth attractive appearance. Good both as a cut flower and for garden use. Pleasant fragrance. Midseason. We consider this one of our finest introductions. \$20.00 each.

**Magnolia** (Japanese type). Bright rose-pink with overlapping petals. Center of enlarged stamens of chrome-yellow which are crusted with golden yellow. Strong vigorous growth. Extra good for garden effects. \$2.50-\$3.50.

**Rapture.** Very large, the outer petals broad and rounded, center petals shorter giving the blooms a cupped effect. Pure white suffused with a soft creamy light. Pleasant fragrance. Midseason. \$15.00 each.

**Summer Cloud.** Faint pink buds open into well-formed flowers with wide outer petals of white and center of narrower petals having a creamy light. Long, strong stems. Midseason. \$4.00-\$5.00.

Annisquam Peony introduced by Cherry Hill Nurseries in 1945

**White Gull** (Japanese type). A double row of broad rounded petals of white surround a cushion of yellow stamens. Red stigmas. Much admired by all who have seen it. \$2.50-\$3.50.

### SERIES A

In this series we have grouped the newest and finest varieties which we have been able to obtain. We grow and test many varieties, listing those which seem most desirable.

Prices quoted are for large divisions of at least three to five buds and for one year clumps; e.g. \$1.50-\$2.00. The first price is for a large division and the second price for the larger plant.

Two-year clumps, add 50% to the one-year price.

Three-year clumps at double the one-year price.

The number following each name is the percentage rating given by the American Peony Society.

**A. P. Saunders** 8.6, a Cherry Hill production. Large, flesh-pink flowers, lighter in center, outer petals sometimes marked carmine. Slightly fragrant. Late. \$1.50-\$2.00.

**Auguste Dessert** 8.7, bright rose-pink with silvery edges. Especially fine for garden effects. Midseason. \$1.50-\$2.00.

**Betty Blossom** 8.7, a Cherry Hill production. Outer petals white slightly tinted yellow, center ring of short petals heavily edged yellow. Total effect, soft yellow. Late midseason. \$1.50-\$2.00.

**\*Cherry Hill** 8.6, a Cherry Hill production. Deep garnet with a sheen which makes a bright appearance in the garden. Center petals are intermixed with golden stamens. The first of our double varieties to bloom and the tall strong stems carry the flowers well. A distinct garden variety. \$1.50-\$2.00.

**Cornelia Shaylor** 9.1, large, full flowers of pyramidal form. Soft pink and white. \$1.50-\$2.00.

**\*Coronation** 8.5, delicately tinted buds and flowers of pale pink. The cup-shaped blooms give a charming effect. Early midseason. \$1.50-\$2.00.

**\*Edwin C. Shaw** 9.1, a Cherry Hill production. Very large flowers of flesh pink with broad rounded petals. Symmetrical in form and cupped in shape, this is especially attractive. Fragrant. Late midseason. \$2.50-\$3.00.

Prices quoted are for large divisions of at least three to five buds and for one year clumps; e.g. \$1.50-\$2.00. The first price is for a large division and the second price for the larger plant.

Two-year clumps add 50 per cent to one-year price.

Three-year clumps at double the one-year price.

Price per dozen at ten times the single rate. Priced at \$1.50 each would be \$15.00 per dozen.

The number following each name is the percentage rating given by the American Peony Society.

The single flowered varieties are the first to bloom, but the side buds will continue to bloom over a considerable season. They are especially satisfactory for garden effects as they withstand the rains and wind where the heavier doubles might be beaten down. The large yellow centers of stamens give a distinct note.

**\*Adana**, broad petals of delicate shell-pink. Long buds resembling roses. \$1.50 each.

**\*Clairette 8.1**, long arching stems bearing large pure white flowers. The petals are long and silky. \$1.50 each.

- \*Victoria**, brilliant crimson flowers which glow in the sun. Foliage dark green. \$1.00 each.

## *Japanese Type Peonies*

These so-called Japanese Peonies which have been grown in this country are those which have one or two rows of petals and centers of stamens much thickened. These latter are almost devoid of pollen and in some varieties make thick cushions of golden yellow. In others the stamens are self-color tipped or crusted with yellow. The effects are beautiful and distinct and are charming for the garden and as cut flower decorations.

Prices quoted are for large divisions of at least three to five buds and for one year clumps; e.g. \$1.50-\$2.00. The first price is for a large division and the second price for the larger plant.

- \*Ama-no-sode 9.2**, large, bright rose-pink with lighter tints. Extra. \$3.00-\$4.00.
- Aureolin 8.9**, pink, deep sulphur center. \$1.50-\$2.00.
- Charm 9.2**, deep red with well-formed center of yellow. The petals are smooth and rounded making a very attractive flower. \$3.00-\$3.50.

**Currant Red**, lively cerise-red petals, stamens yellow, marked with self color. \$3.00-\$4.00.

**\*Departing Sun 8.5**, broad petals of carmine-red. Stamens petal color, crested yellow. When seen in the light of the setting sun, it fairly glows. \$2.50-\$3.50.

**Dog Rose 7.9**, attractive soft pink. \$1.50-\$2.00.

**Emma**, broad petals of bright pink. Very fine variety. \$3.00-\$4.00.

**\*Francois**, bright red with salmon tints with heavy golden center. Late midseason. \$1.50-\$2.00.

**\*Glow**, deep cerise-pink petals surround a cushion of narrow petals overlaid and crusted with straw yellow. A bright tone in the garden. \$2.00-\$2.50.

**Hakodate 9.0**, cup-shaped petals of white with central cushion of yellow. Late. \$5.00-\$6.00.

**Hari-ai-nin 8.9**, dark maroon-red petals with center composed of broad stamens the same color of petals but heavily tipped yellow. Total effect of stamens is lines of red and yellow. \$2.50-\$3.00.

**\*Isani Gidui 9.3**, rounded petals of pure white surround a compact cushion of golden stamens. Lovely white and gold effect. \$3.00-\$4.00.

**Jeffries' Crimson**, broad, rounded petals of deep crimson with a satiny finish. Compact mass of yellow stamens make a flower which strikes a distinct note in the garden. \$1.50-\$2.00.

**\*King of England 8.6**, a rich shade of carmine, stamens self-color edged golden. \$1.50 each.

**\*Margaret Atwood 8.7**, broad petals of pure white are cupped around a mass of golden yellow stamens giving a charming effect. \$2.00-\$2.50.

**\*Mikado 8.6**, rich red petals and a broad center of stamens of deep yellow edged red. \$1.50 each.

**Purity**, white petals inclose a cushion of yellow stamens. \$1.50 each.

**Purple Cup**, cherry-red petals and yellow center. \$1.50 each.

**Soshi**, deep crimson and gold. Very effective in the garden. \$2.00-\$3.00.

**\*Tokio 8.9**, tall, strong stems, flowers of rose-pink with large yellow center. Blooms freely. \$1.50-\$2.00.

**Toro-no-maki 9.0**, large white petals, center creamy, stamens edged and tipped yellow. \$3.00-\$4.00.

**\*Varieties in this class we have found to be the best and most reliable for color and free-blooming quality.**

### ASSORTED COLLECTIONS

For those who wish a good collection without names, we can furnish a good assortment in two grades—\$4.00 and \$6.00 per dozen. They are all good varieties and would be worth much more if sold to name.

For those who wish Japanese-type Peonies, we can furnish two grades in a mixture of colors. \$5.00 and \$7.50 per dozen.

## *Tree Peonies*

Tree Peonies make a woody growth and do not die back to the ground in the fall, but eventually form broad shrubs. Propagation is difficult and the growth is slow, but if one will be patient, the results are well worthwhile. The color range is far wider than in the herbaceous class including the salmon-pinks and yellow.

The buds start very early in the spring and the plants should be shaded through the winter to delay the growth so that it will not be damaged by late frosts.

We can furnish a limited number at \$5.00 to \$10.00 each.

## *Phlox*

For masses of color in the garden or border in summer and early fall, there is nothing more satisfactory than Phlox. The newer varieties have been selected for their clear coloring—bright scarlet reds, clear pinks, soft lavenders and purples avoiding magenta. These with white give pleasing color combinations.

Phlox should be planted in well-drained, fertile soil and thinned every three or four years. This allows more air drainage and overcomes the tendency for the lower leaves to mildew. Dusting the foliage with sulphur is also one of the best methods of prevention. Pick off the faded blooms before the seed ripens. This allows the plant to make a second flowering and prevents seedlings springing up and choking the parent plants. Seedlings are usually inferior in color and cause much confusion.

*(Continued on next page)*

40 cents each; \$3.50 per dozen.

Six plants of one variety will be furnished at the dozen rate.

**B. Comte**, medium height, midseason. Deep velvety shade of reddish-plum color. Vigorous growth.

**Daily Sketch**, medium height, late midseason. Extra large flowers of brilliant salmon-pink with darker eye.

**Evelyn**, tall, midseason. Rich salmon-rose panicles and trusses of immense size. Very fine for massing.

**Europa**, medium height, midseason. Large broad heads. White with distinct carmine eye.

**Frau Anton Buchner**, medium to tall, midseason. Large ivory-white flowers make a fine mass effect.

**H. B. May**, medium height, midseason. Very large flowers of clear pink.

**Jules Sandeau**, medium height, midseason. Large flowers of bright rose to watermelon-pink.

**Mary Louise (Saunders)**, tall, late. A variety we introduced and has proved to be the best white phlox. Waxy white flowers of especially large size.

**Miss Lingard**, medium height. Columnar heads of white in June continuing in bloom throughout the season.

**Mountain Laurel**, tall, midseason. The delicate shell-pink flowers borne in broad heads remind one of the pink Mountain Laurel.

**Reichsgraf von Hochberg**, medium, midseason. Brilliant wine-red. Very attractive.

**Salmon Glow**, medium height, late. Large florets of rich salmon-pink with somewhat lighter centers. A group of these is very effective in the garden.

A border planting of Rhododendrons

## *Iris*

The bearded Iris have a wide range of color, their various tints and hues embracing all colors of the rainbow. They are hardy and easy to grow, continuing for years with almost no attention. Liberal use will produce masses of bloom making a most colorful garden through May and June.

We are constantly adding new varieties which we consider have intrinsic worth and discarding those which are superseded.

The old leaves and stalks should be cleaned off and burned to leave no harboring place for disease or pests.

Price per dozen is ten times the each cost.

**Alta California**—tall, clear yellow slightly flushed bronze at base of petals. 50 cents.

**Ambassadeur**—tall, reddish-violet with velvety violet falls. 30 cents.

### *Various Iris*

- Sibirica orientalis**—narrow foliage and deep blue flowers resembling Spanish Iris, but hardy. Naturalizes well. 30 cents.
- Sibirica Snow Queen**—a white flowered form of the above. 30 cents.

## *Cherry Hill Perennials*

Herbaceous perennials form one of the most important parts of the garden or border as they continue to increase in size and beauty from year to year. A selection will give bloom throughout the season.

There is such an immense range of species and varieties that we do not attempt to grow them all and offer those which have proved the most hardy and satisfactory for these climatic conditions. We are constantly trying new varieties and adding those of merit.

**Strong Field Grown Plants of the following are priced at 35 cents each; \$3.50 per dozen of one variety except as noted.**

- Aconitum fischeri (Monkshood).** Tall stems bearing long heads of blue flowers. Does well in partial shade. Ht. 4 to 5 ft. September.
- Aconitum napellus bicolor.** Upright growth bearing pyramidal heads of attractive blue and white flowers. Ht. 3 ft. July-August. 40 cents.
- Anchusa italica Dropmore.** Very attractive with its bright blue flowers on strong branching stems. May-June. Ht. 4 ft.

**Chelone-lyoni.** (Turtlehead). Bladder-like flowers of bright purplish-red. July-September. Ht. 3 ft.

### CHRYSANTHEMUM—Hardy Garden Varieties

The first 4 varieties are variants of Amelia often called Azalea or Cushion mums. The plants make low mounds covered with literally hundreds of blooms from early August until hard frosts. They will give an abundance of color for a long season.

**Amelia.** Soft rose-pink. Very attractive.

**Amelia, Bronze.** Bronze buds open into bronze yellow.

**Amelia, Red.** Bright crimson with yellow center.

**Amelia, Yellow.** Clear, bright yellow.

**Clara Curtis.** Dwarf plant covered with flowers of soft pink with yellow centers. August to frost.

**Cocheco.** Very hardy variety producing rounded plants which are covered by a profusion of bright rose-purple, double flowers. Blooms in early fall and continues in good condition for several weeks. Ht. 2 ft.

**Early Bronze.** Attractive bronze-colored flowers in October. Ht. 2 ft.

---

**Chrysanthemum, Shasta Daisy, Alaska.** A glorified monstrous white daisy borne on strong stems. Ht. 2 ft. June to October.

**Convallaria majalis.** (Lily of the Valley). Waxy white bell-shaped flowers. Ht. 6 in. May. Fine for shady places.

**Delphinium hybridum.** A very choice strain with flowers ranging from the darkest to the lightest blue on long spikes. June to September. Ht. 5 to 6 ft.

---

Our interest does not end after we have made the sale.

**Delphinium Pacific Giant Hybrids.** A new strain producing the finest selection of bloom we have ever grown. Large flowers on long strong stems, are mostly double in combinations of lavender and blue. 50 cents.

**Delphinium "Galahad Series."** Pacific Giants producing white flowers of large size. By far the best white Delphinium. 60 cents.

**Dianthus plumarius.** (Grass Pink). Light, silvery foliage. Fragrant flowers varying from flesh-white to deep pink. May-June. Ht. 12 in.

**Dicentra spectabilis.** (Bleedingheart). An old-time favorite with heart-shaped pink and white blossoms borne in long sprays. May-June. Ht. 2 ft. 75 cents.

**Dictamnus fraxinella.** (Gas Plant). Deep rose-pink flowers borne on bushy plants. Very attractive. June. Ht. 2 to 3 ft. 40 cents.

**Dictamnus f. alba.** A white flowering form of the above. 40 cents.

**Digitalis gloxinoides.** (Foxglove). A biennial bearing long spikes of showy flowers in assorted colors. June-August. Ht. 3 to 4 ft.

**Digitalis lutea.** Pale yellow flowers borne on stems. Ht. 1½ to 2 ft. July, August.

**Euphorbia polychroma.** (Cushion Spurge). Forms bushy plants about 12 inches high with chrome yellow flower bracts. Will grow in shady places. May and June. 45 cents each.

**Gaillardia grandiflora.** (Blanket Flower). Daisy-shaped flowers of yellow with deep crimson centers. July-October. Ht. 2 ft.

**Gaillardia, Burgundy.** Deep red flowers in profusion. Ht. 2 ft.

**Geum, Mrs. Bradshaw.** Attractive flowers of deep scarlet. Ht. 12 in. June-July.

### HEMEROCALLIS—DAYLILY

The new varieties have a much wider range of color and their longer season of bloom from July to September, adds increased interest to the border.

**Goldeni.** A beautiful smooth, rich orange with bronze undertone. Blooms freely through July. Ht. 2½ ft.

**Hyperion.** Very large broad petals of clear canary-yellow. The flowers are 5 to 6 inches across. Considered the finest of all. 60 cents.

**Mikado.** Mellow orange, shading into deeper tones of dark red-purple. Of unusual and distinct coloring. 50 cents.

**The Gem.** Rich golden-yellow with bronze lights. Ht. 2½ ft. June-July.

---

Let us plant your home grounds.

- Hemerocallis flava.** (Lemon Lily). An old favorite which is excellent for massing. Clear lemon-yellow. June. Ht. 2½ ft.
- Heuchera sanguinea.** (Coral Bells). Bright coral-red flowers on long stems. Good for cutting. Ht. 1 to 2 ft. June to September.
- Hollyhocks.** This popular biennial in double mixed, of red, pink, yellow, etc.
- Hosta coerulea.** (Plantainlily). Light blue flowers. Foliage of tropical appearance. Ht. 18 to 24 in. July to August.

## PLANTING

On large orders or trees in the larger sizes where the home owner cannot plant alone or obtain help in planting, we can, when previously arranged for, plant the stock we furnish. The plantsmen we can supply have had many years of experience at this work.

## MAINTENANCE AND CARE

Evergreens and shrubs, when planted near the house, will in a few years, grow too large for the space assigned them and will mar the effect which was originally intended. Instead of waiting until they are too large and then pruning them drastically, it is much better to give them a light pruning every year. By this method no large branches are cut and the planting will continue for many years improving in value and appearance. We have men available in the summer and winter months and the cost is slight when compared with the results obtained.

Especially near the house, the soil is often dry and lacking in plant food, and it is better to make a light application of fertilizer every year rather than too much at one time.

## LARGE TREES

Large specimen trees may be moved with safety at almost any time of the year. The modern method of digging with a large ball of earth on the roots ensures the continuous flow of sap through the fine feeding roots. Trees handled in this manner usually continue to grow without any check and make immediate landscape effects. If arrangements can be made to do this in the winter when the ball of earth may be frozen, it will be found the most economical way. The use of a few large specimens with the smaller plants gives very pleasing and satisfactory effects. We have growing a large variety of specimens which we can furnish, and are prepared to give you estimates on your needs without obligation on your part. You are cordially invited to visit the nurseries and see the quality of the trees and plants at Cherry Hill.

**Proper planting fits the home to the surrounding landscape**

We invite your attention to the easy manner in which our nurseries may be reached. We are only 36 miles north of Boston and excellent motor roads from all directions reach our place. From Boston via the Andover turnpike, through Haverhill, or via the North Shore and Newburyport, or over the historic Newburyport Turnpike, turning at Governor Dummer Academy. From the north, down the beautiful Merrimack Valley, and from Maine and the Provinces through Portland and Portsmouth.
